Coniferous Evergreens

The greatest advantage of using Evergreens in beautifying the home grounds is that Evergreens retain their foliage the year around. By planting the proper varieties in their proper places wonderful results can be obtained with but little expense. It is necessary however to plant Evergreens where they will get ample sunlight that they may show to best advantage. If you are not familiar with the planting of Evergreens and wish to plant at this time, please write to us for pleasure for us to furnish you with such information you may wish to help you.

SPECIAL ROCK PLANT OFFER

12 PLANTS \$1.00

Two each of the following from 2¼ inch pots. All should bloom this year.

Arabis Alpine—White

Saponaria Ocymoides—Rose

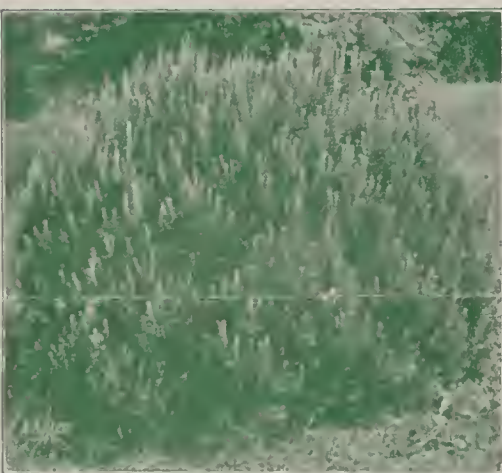

Dianthus Deltoides—Carmine

Veronica Rupestris Nana—Blue

Nepeta Mussina—Lavender

Pyrethrum—Rose

All Above Varieties Our Best Rock Plants

DWARF, OR MUGHO PINE

HILL'S SILVER JUNIPER. *Juniperus scopulorum*—Beautiful silvery-blue color. Narrow, compact and symmetrical. It has one single stem, in contrast to some varieties of junipers with several stems. This makes it safe from heavy snows and wind. The inner foliage does not turn brown. New introduction by D. Hill. This is the seedling form containing both blue and green trees.

24 to 30 inches.....	\$2.00
3 to 4 feet.....	\$3.50
